The screenshot shows a Windows desktop environment with a Python development setup in Visual Studio Code (VS Code) and a standard taskbar.

VS Code (Top Window):

- File Explorer:** Shows files: main.py, vehiculo.py, automovil.py, motocicleta.py (active), and motor.py.
- Code Editor:** Displays the contents of motocicleta.py. The code defines two motorcycle objects: motocicleta1 (Yamaha MT-09) and motocicleta2 (Ducati Panigale V4). It prints the brand of each motorcycle.
- Terminal:** Shows the output of running the script: two motorcycles are created with their details, and each motorcycle's engine starts with a kickstart sound effect and a wheelie message.
- Status Bar:** Shows the file path (UsoGit > motocicleta.py), encoding (UTF-8), and Python version (Python 3.13 (UsoGit)).

Taskbar (Bottom):

- Windows Start button.
- Search bar with placeholder "Buscar".
- Icons for various system and application tasks, including File Explorer, Edge browser, File History, Task View, Task Manager, and File Explorer.
- System status icons: battery level (1%), temperature (32°C), signal strength, and network connection.
- Date and time: 14/11/2025, 16:35.
